Fullerene 445

Gallium
– arsenide 54, 60, 149, 171, 180, 187, 195, 203, 212, 226
– indium arsenide 149
– indium phosphide 128
– phosphide 165
– selenide 398
Germanium 48, 105

Hydrodynamics, see Convection

Ice 420, 455
Indium
– arsenide 60, 143, 226
– gallium antimonide 220

Kinetics
– of dissolution 295, 304
– of growth 54, 60, 143, 149, 232, 295, 304, 318, 411, 420, 445, 461
– of interface control 86, 149
– of nucleation 54, 67, 426, 440

Lasers, see Device characterization
Lead
– telluride 353

Melt growth technique
– by Bridgman–Stockbarger method
– – of gallium selenide 398
– – of indium gallium antimonide 220
– by Czochralski method
– – of dysprosium gadolinium gallium garnet 393
– – of dysprosium gallium aluminum garnet 393
– – of lanthanum gallium silicate 388
– – of lithium niobate 403
– – of silicon 238, 359
– – theory of large scale growth 249
– by floating zone method
– – of aluminum doped rutile 279
– – of molybdenum alloys 259
– by zone melting
– – of silicon germanium 243
– theory
– – of dynamic contact angle 329
– – of microsegregation 461
Mercury
– cadmium telluride 348
– iodide 411
Microgravity, growth under
– of copper two oxalate 474
– theory of dynamic contact angle 329
Monte Carlo simulation
– of ordered structure 122
Morphological stability
– of fullerene 445
– of mercury cadmium telluride 348

Nucleation
– of barium sulphide 318
– of behenic acid 440

– of calcite 434
– of potassium dihydrogen phosphate 426
– of struvite 434
– theory of
– – critical nucleus 1

Phase diagram
– of indium gallium antimonide 220
– of ternary borates 272
Precursor
– for gallium aluminum arsenide 212
– for gallium arsenide 187, 212
– for fullerene formation 445

Silicon 39, 48, 78, 105, 238, 359
– germanium 243
Solid growth technique
– by ion irradiation
– – of silicon 78
Solution growth technique
– by bacterial membranes
– – of struvite 434
– by flux method
– – of gadolinium aluminum borate 272
– – of gadolinium scandium borate 272
– – of lithium triborate 266
– – of ytterbium aluminum borate 272
– – of ytterbium scandium borate 272
– by hydrothermal growth
– – of calcite 285
– – of hydroxy apatite 311
– by low temperature method
– – of behenic acid 440
– – of palladium clusters 377
– – of silicon 470
– theory of supersaturation 318
Stefan problem or moving boundary
– of dynamic contact angle 329
Superconductivity materials, high T_c
– bulk
– – of praseodymium cerium copper oxide 369
– film
– – of BSCCO 100
– – of BSCO 100
Superlattices, multilayers
– of III–V compounds 226
Surface energy, determination
– of fluorapatite 295, 304
– of hydroxyapatite 304
Surface morphology
– of calcium fluoride 31
– of gallium arsenide 171
– of germanium 48
Surface structure
– of gallium arsenide 54, 67, 113, 180
– of ice 455
– of molecular beam epitaxy 22
– of replicated substrate surface 339
– of silicon 78
– theory of roughening 8

Thin film growth, epitaxy
– by atomic layer epitaxy
– – of calcium fluoride 31
– – of gallium arsenide 180
– by chemical beam epitaxy
– – of gallium arsenide 187
– by gas source molecular beam epitaxy
– – of germanium 105
– – of silicon 105
– by liquid phase epitaxy
– – of BSCCO 100
– – of BSCO 100
– – of lead telluride 353
– – of mercury cadmium telluride 348
– – of neodymium doped aluminum gallium arsenide 343
– – of silicon 470
– by molecular beam epitaxy
– – of aluminum gallium arsenide 149
– – of aluminum nitride 93
– – of calcium fluoride 31
– – of gallium arsenide 60, 149
– – of indium arsenide 60, 143, 149
– – of indium gallium arsenide 149
– – of silicon 39
– – of silicon carbide 93
– – theory of binary growth 135
– by vapor phase epitaxy
– – through evaporation and condensation
– – – of germanium 48
– – – of silicon 48
– – through metalorganic chemical vapor deposition
– – – of aluminum gallium arsenide 212
– – – of gallium aluminum nitride 86
– – – of gallium arsenide 54, 67, 171, 195, 203, 212
– – – of gallium indium nitride 86
– – – of gallium indium phosphide 128
– – – of gallium nitride 86
– – – of gallium phosphide 165
– – – theory of 54
– – through microwave plasma chemical vapor deposition
– – – of aluminum nitride 232

Vapor growth technique
– by evaporation and condensation
– – of alpha mercuric iodide 411
– – theory of coupled step flow 411
– Vapor–liquid–solid growth
– of ice 420

Whisker growth
– of gallium arsenide 226
– of indium arsenide 226
